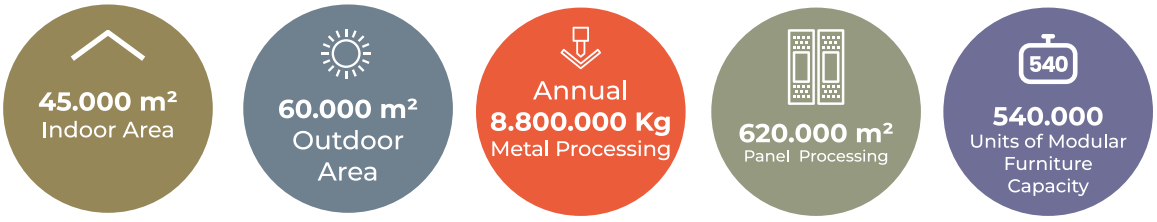
Marwood

PROFILE

WE PROVIDE SUSTAINABLE SOLUTIONS WITH AN ETHICAL UNDERSTANDING FOCUSING ON NATURE AND HUMAN.

Founded in 1982 in a small woodworking shop in Nizip, Gaziantep, Marwood has grown to become the region's largest furniture manufacturer, equipped with state-of-the-art machinery and a skilled workforce. Specializing in office and communal space furniture for various sectors such as workspaces, education, and hospitality, Marwood operates with a vision to drive the furniture industry forward—integrating design, R&D, sustainability, and regional development. The company's 400-strong team, 25% of whom are women, is dedicated to shaping the future of modern furniture.

Marwood combines over 40 years of manufacturing experience with smart design concepts that meet today's evolving workplace standards. With facilities spanning 45,000 m² of indoor and 60,000 m² of outdoor space in Nizip, the company creates innovative, modern furniture solutions. Through a global network of 110 dealerships and service solutions, Marwood delivers a holistic design and production approach, catering to both project partners and end-users alike.



MISSION & VISION

Our Mission; At Marwood, we enrich work and social spaces with sustainable, aesthetic, and functional furniture through our commitment to sustainability-focused production and ethical business practices. By synthesizing the value of collaboration and the human element with our design approach, we aim to create happier and more productive office environments for companies with diverse dynamics.

Prioritizing smart design principles, we produce long-lasting, functional, and sustainable solutions, delivering trust and quality to our clients. In every project, we strive to create innovative and eco-friendly values.

Our Vision; We aspire to become a global leader in the furniture industry, shaping the future with sustainable and innovative solutions. Our goal is to foster reliable, benefit-driven, and long-term partnerships with our business partners, growing together as we evolve.

Through advanced design and technological solutions, we are continually improving to create happier and more productive workspaces.

BRAND ATTRIBUTES

FROM NATURE TO NATURE

We are aware that our planet is the only home we share with all living beings. As Marwood, we take on the responsibility of this truth, following a production and management policy that respects our resources and considers both the present and the future.

Focusing on good design, conscious production,refined service, and a human-centered approach, we act with the awareness of this responsibility. We develop nature and human-focused, conscious, and inclusive policies, prioritizing the continuous improvement of these policies in all our business processes and goals.

Marwood FLEXO flexible working structures

At Marwood, we design functional and value-driven furniture beyond trends with the FLEXO principle. With our durable, timeless, and modular products, we offer sustainable and solution-oriented approaches at every stage, from production to user experience.

FLEXO represents a comprehensive design culture that combines aesthetics, functionality, and quality, carefully developed by Marwood. By adopting a flexible and sustainable approach at every stage, from material sourcing to production, logistics, and end-user experience, we create high-functional, long-lasting products

The FLEXO principle brings together aesthetics, functionality, and quality, providing ideal solutions in terms of efficiency and sustainability.

BRAND ATTRIBUTES

Marwood
Dealer
empowering partners

At Marwood, we offer a dealership system that delivers efficient, tailored solutions for both local and global markets. From design to logistics, we ensure smooth project execution with a focus on customer satisfaction and budget-friendly planning.

With a transparent and ethical business approach, we support our dealers through personalized services—from space planning to product design—helping them bring their projects to life. We continuously strengthen our position by prioritizing quality and user experience.

Marwood
ecohue
waste paint reclamation

We aim to adopt eco-friendly practices across all production stages—covering material selection, chemical use, waste management, and recycling.

With the EcoHue protocol, we recycle 4 tons of powder paint waste annually, achieving a 100% recycling rate. The mixed waste creates a gray-toned paint used on hidden surfaces in our designs.

Each year, we color and finish 26,800 m^2 of material using this recycled EcoHue gray.

SAIL

SAIL

The Sail Meeting Table is designed for the dynamic and collaborative structure of modern offices. Its signature boat-shaped aluminum edge offers a light visual touch, while sleek profile lines add a sophisticated atmosphere.

Customizable in materials, colors, and sizes, Sail adapts to everything from intimate meetings to large team gatherings.

Blending aesthetics and functionality, Sail ensures long-term durability with its cast iron legs and robust aluminum frame. Its compatibility with matching sofas, bar-height tables, and partitions allows for a cohesive and refined office environment.

FLY

FLY

Fly Sofa reflects the character of modern offices with its dynamic form and bold structure.

Electrostatic painted metal legs and melamine-detailed armrests add industrial elegance to the design.

Upholstered in fabric or faux leather, it offers both durability and comfort—making it a perfect fit for waiting areas and shared spaces.

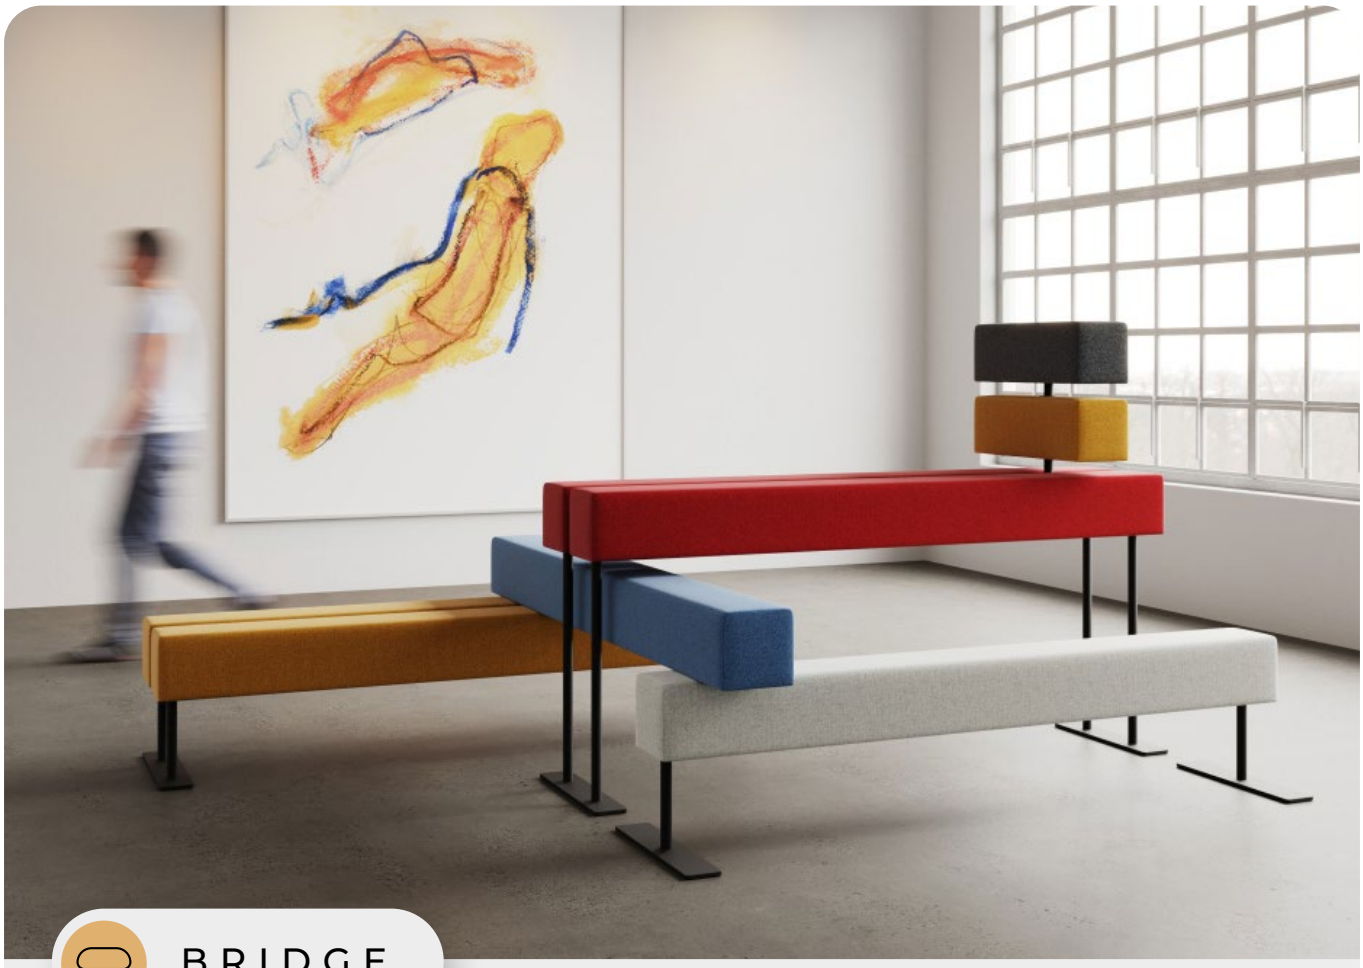
BRIDGE



BRIDGE

Meet Bridge, a versatile furniture system designed to transform social and collaboration spaces. With its rectangular prism surfaces, Bridge allows limitless configurations — from simple bench setups to complex compositions, spreading across wide areas to create multifunctional environments.

Bridge challenges traditional furniture norms by creating flexible areas that encourage social interaction and creative collaboration. From foyers and museums to semi-open spaces, campuses, and cafeterias, Bridge adapts to diverse uses. Its form makes it ideal for workshops, flexible meeting spaces, and lobbies.

With 13 powder-coated metal colors and upholstered sections, each piece can be customized with various fabrics, resulting in unique visual expressions. This variety allows Bridge to fit perfectly into any environment, making it a standout solution for those seeking flexibility and creativity.

LOOP

LOOP

A Fluid Form for Relaxed Spaces: Loop brings an elegant seating solution to modern social areas with its simple, fluid form and soft curves. Its low seating height and rounded edges strike a balanced relationship between comfort and aesthetic appeal.

Used alone, it acts as a compact and minimal pouf; when multiple modules are combined, Loop creates continuous, flowing seating layouts. It easily adapts to a wide range of spaces such as cafeterias, foyers, office lounges, waiting areas, and semi-open environments.

With fabric and faux leather options, Loop offers a broad material palette and stands out as a minimal design element that can differentiate interior compositions through color and texture. It is a strong and simple modular seating solution for designers looking to create flexible, inviting, and user-friendly environments

CLUSTER

CLUSTER

A New Approach to Modular Space Design: Cluster is a modular furniture family that offers flexible and fluid seating solutions for various scenarios. Inspired by organic forms, it functions as a simple standalone pouf, while multiple units come together to create creative compositions that foster social interaction.

Combining straight and curved modules, Cluster adapts to diverse spaces—from lounge areas and office breakout zones to waiting rooms and educational/event environments. Its compact dimensions and lightweight structure allow it to be easily reconfigured, bringing dynamism to any setting.

Whether used individually or in grouped configurations, Cluster provides customized solutions with different fabric and color options. It is an effective alternative for those seeking a functional and contemporary seating system that supports collaborative culture in social spaces
